

# Wide flat aluminium profile, 2 m

**340-12006**

**4** year warranty

This protective profile is suitable for LED strips with monochrome, tunable white, RGB or RGBW LEDs. The profile is especially handy for holding wider LED strips or for mounting several LED strips next to one another on the profile. You can place a milky white cover (340-13008) or a transparent cover (340-13009) on this profile. You easily surface mount the profile using the optional spring terminals (340-14020) which fit the rear of the profile perfectly.

## Technical data

Wide flat aluminium profile, 2 m

Profile made of anodised aluminium, with:

- outside dimensions: 10 x 26 x 2000 mm (HxWxL)
- utilisable inside width: 22 mm

The profile is especially handy for holding wider LED strips or for mounting several LED strips next to one another on the profile. You can place a milky white cover or a transparent cover on the profile. You easily surface mount the profile using the spring terminals which fit the rear of the profile perfectly.
