Your home works better with Niko

Your home works better with Niko

Your home works better with Niko Home Control

Live more comfortably and safer, whilst saving maximum energy. Niko Home Control controls the electrical devices and systems in your home. You control everything with switches, a flexible control and/or your smartphone. The possibilities of Niko Home Control are endless. Thanks to its timeless design, the system fits seamlessly into your interior.

Ready for the future

Niko Home Control is the ideal solution for enabling your electrical devices to evolve alongside our rapidly changing lifestyles and methods of communication. The home automation system pushes the boundaries of comfort, safety, user-ease and energy consumption. Niko Home Control is continually evolving to keep up with the latest trends and standards. With Niko's wireless solutions, you can easily install switches anywhere in the house, without creating any dust.

For you and your family

With Niko Home Control, you and your family are kept comfortable and safe. Turn off all of the relevant items in your home with one press of a button? No problem at all with Niko Home Control.

Belgian quality and expertise

With 100 years of experience, including over 20 years in home automation, Niko is the market leader and an established name in Belgium. With Niko Home Control, you're choosing genuine Belgian expertise. Innovation is at the heart of everything we do.

Central platform for your home systems

Smart systems from other brands are easily connected to Niko Home Control. And you can operate your heating, ventilation, audio and whatever else you like. API integration with Niko partner systems, hobby API or API for system integrators.

What can you do with Niko Home Control and Protherm?*

- Control your room temperature
- Check your current room temperature
- See your outside temperature
- Choose your heating program routine (e.g. Home, Away)
- Select your operation routine (Summer, Winter, frost guard)
- Check the domestic hot water temperature
- Boost the domestic hot water temperature

You can have those functions directly available in your NHC user interface , or they can be combined in routines/actions to control multiple items simultaneously via one simple button press (e.g. Turn off all lights and reduce the set point temperature by using the all-off/Leaving home button).

You always can use the APP of Protherm for more advanced settings and configurations within the partner's system

(*) available functionality within Niko Home Control depends upon the specific installation features of the partner's system

What do you need?

No additional electrical wiring is required. You have a computer with a web browser and an internet connection to setup the link between both systems

niko

Your Niko Home Control installation meets the following requirements:

- It has a wireless smart hub or connected controller II.
- It is configured with the most recent programming software (version 2.12 or higher).
- It has an active internet connection.
- It is registered and you have your e-mail address and password on hand.
- If you want to use the Protherm functions in combination with Niko Home Control actions, these actions need to be programmed with the Niko Home Control programming software before the link is activated.

Your Protherm system meets the following requirements:

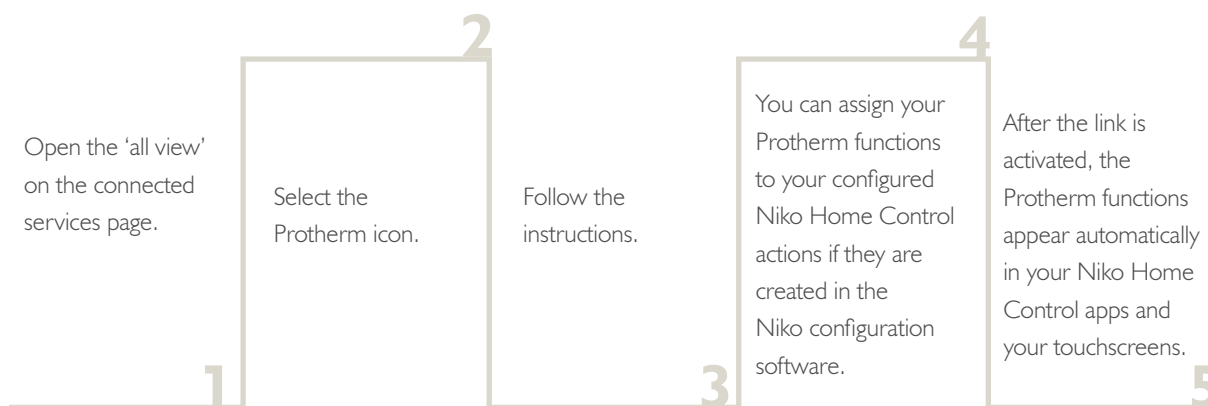

- It is a Protherm boiler having an eBUS connection.*
- It has a MiGo thermostat.
- Your MiGo thermostat is registered via the Protherm MiGo smartphone APP.
- It has an active internet connection.
- You need the serial number of the MiGo communication unit for the activation of the link between Niko Home Control and the Protherm system.

* for example ThemaTek and ThemaClassic boilers do not support eBUS or the MiGo thermostat; when unsure, contact your Protherm installer or sales representative

How do you activate the link?

Go to your “mynikohomecontrol” webportal (<https://mynikohomecontrol.niko.eu/enus>) and login with your Niko Home Control credentials
