

Motion detector, 230 V, 8 m, 180°, wall detector, for flush-mounting box, anthracite coated

122-78010

4 year warranty

With this integrated indoor motion detector with a 10 A, 230 V switching contact, you have a viewing angle of 180° (horizontal) and 60° (vertical) within which all movement is detected. When a motion is detected, pre-selected lights are activated.

Finishing colour: anthracite coated

Compatible secondary detectors: XXX-78010

This article is protected by at least one patent (application). For more info on patents, see www.niko.eu/innovation.

- Sustainable
- Compact
- Simple installation
- Discreet
- The motion detector can be used as a master or secondary detector.

Motion detector for residential use for small rooms, toilets, storerooms, cellars, etc.

- The lighting remains on while motion is detected.
- The built-in time switch allows you to set the desired switch-off delay. The lighting will remain on throughout the disconnection time after the last movement has been detected.
- The lighting can stay on for four hours if you press the button located above the sensor. You can also connect a push button or external switch on this motion detector if you need to be able to control the lighting circuit manually.
- Can be integrated into all Niko central plates.
