Switch

Switch_{to}
beauty

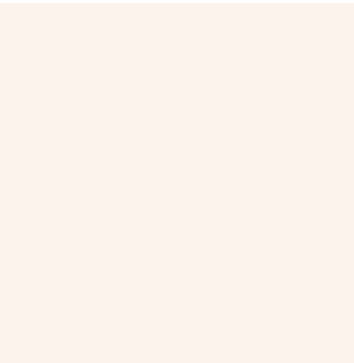

Beauty that speaks

Do you feel like using switches to make a statement in your home?

With Niko's interchangeable push buttons and flush surround plates you'll inject colour into your home in a flash. All the devices and flush surround plates in the Niko range are compatible and perfectly interchangeable.

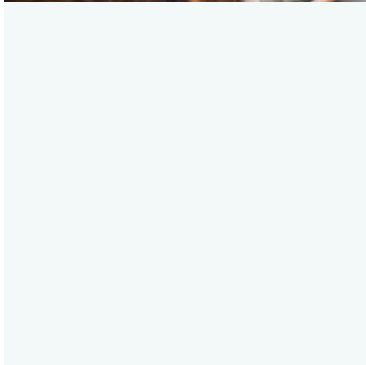

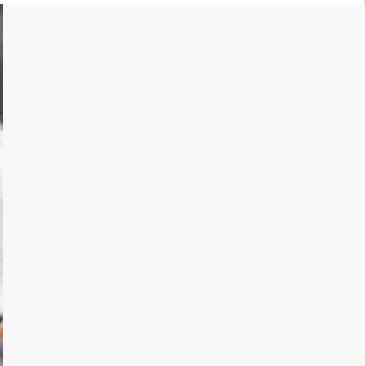

It's all in the details

Turn switches, thermostats and numerous other Niko applications into bold eye-catchers. With our entire range of pure lines and shapes, nothing could be easier. And our carefully selected materials offer elegant solutions for every interior style.

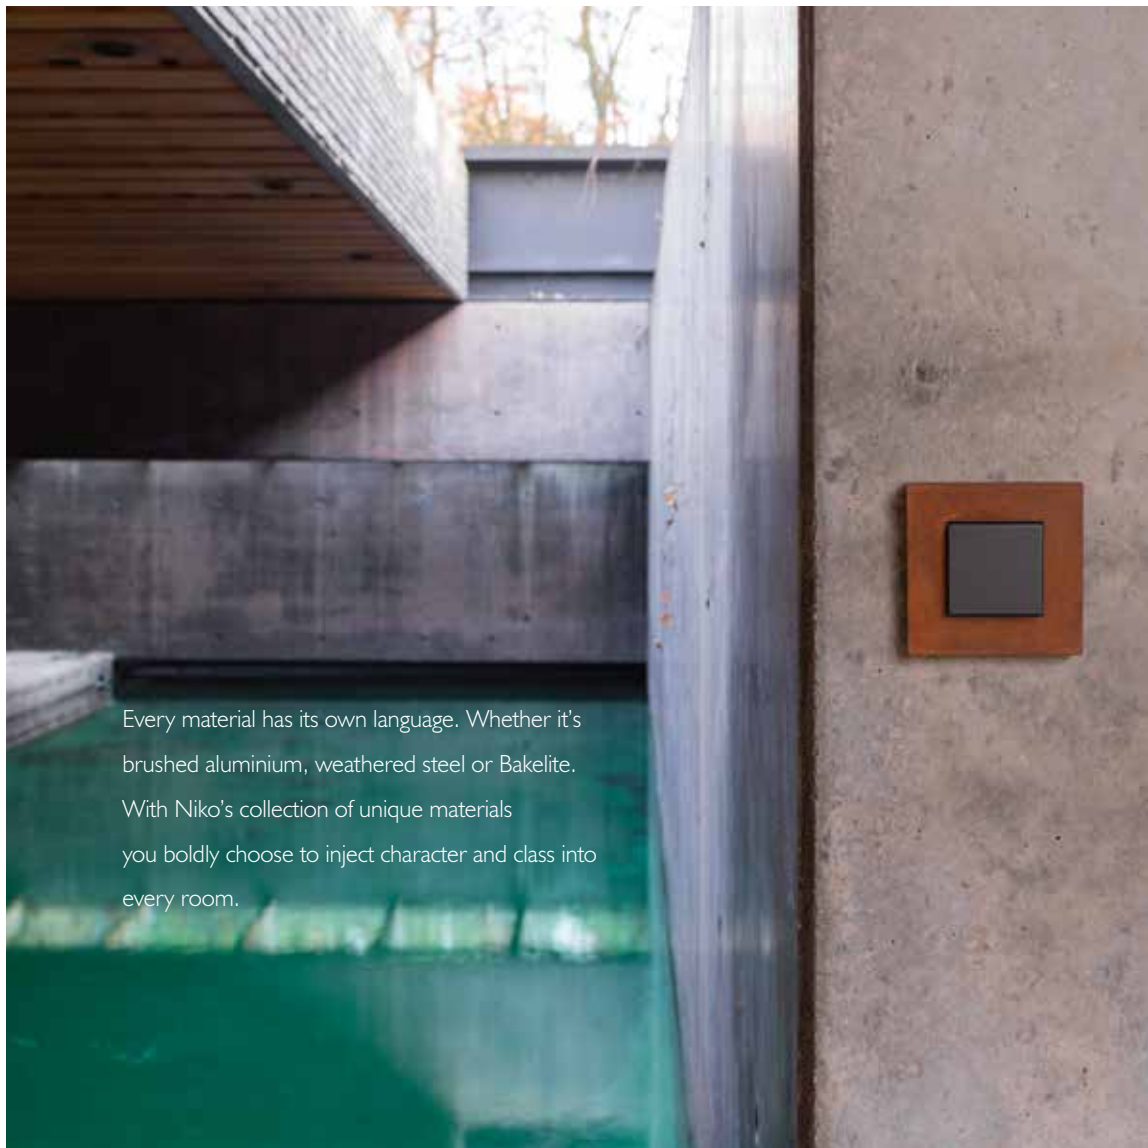

But you will find that the other
switches blend into your interior
with just as little effort. From white
to white, or black to black, or one of
the many other matching colour tones
you can pair.

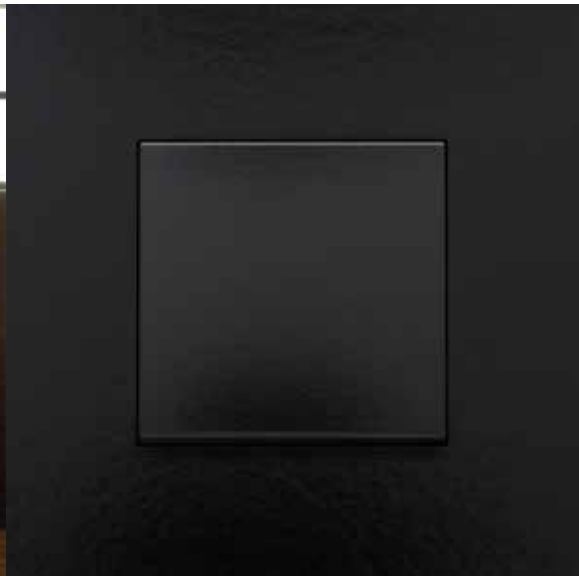

Back to pure materials

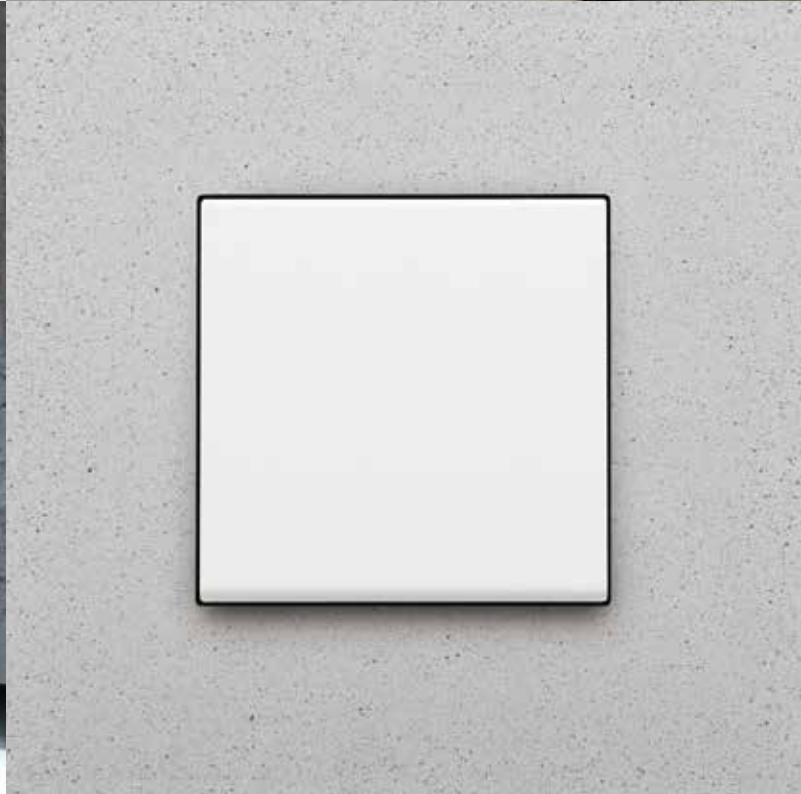

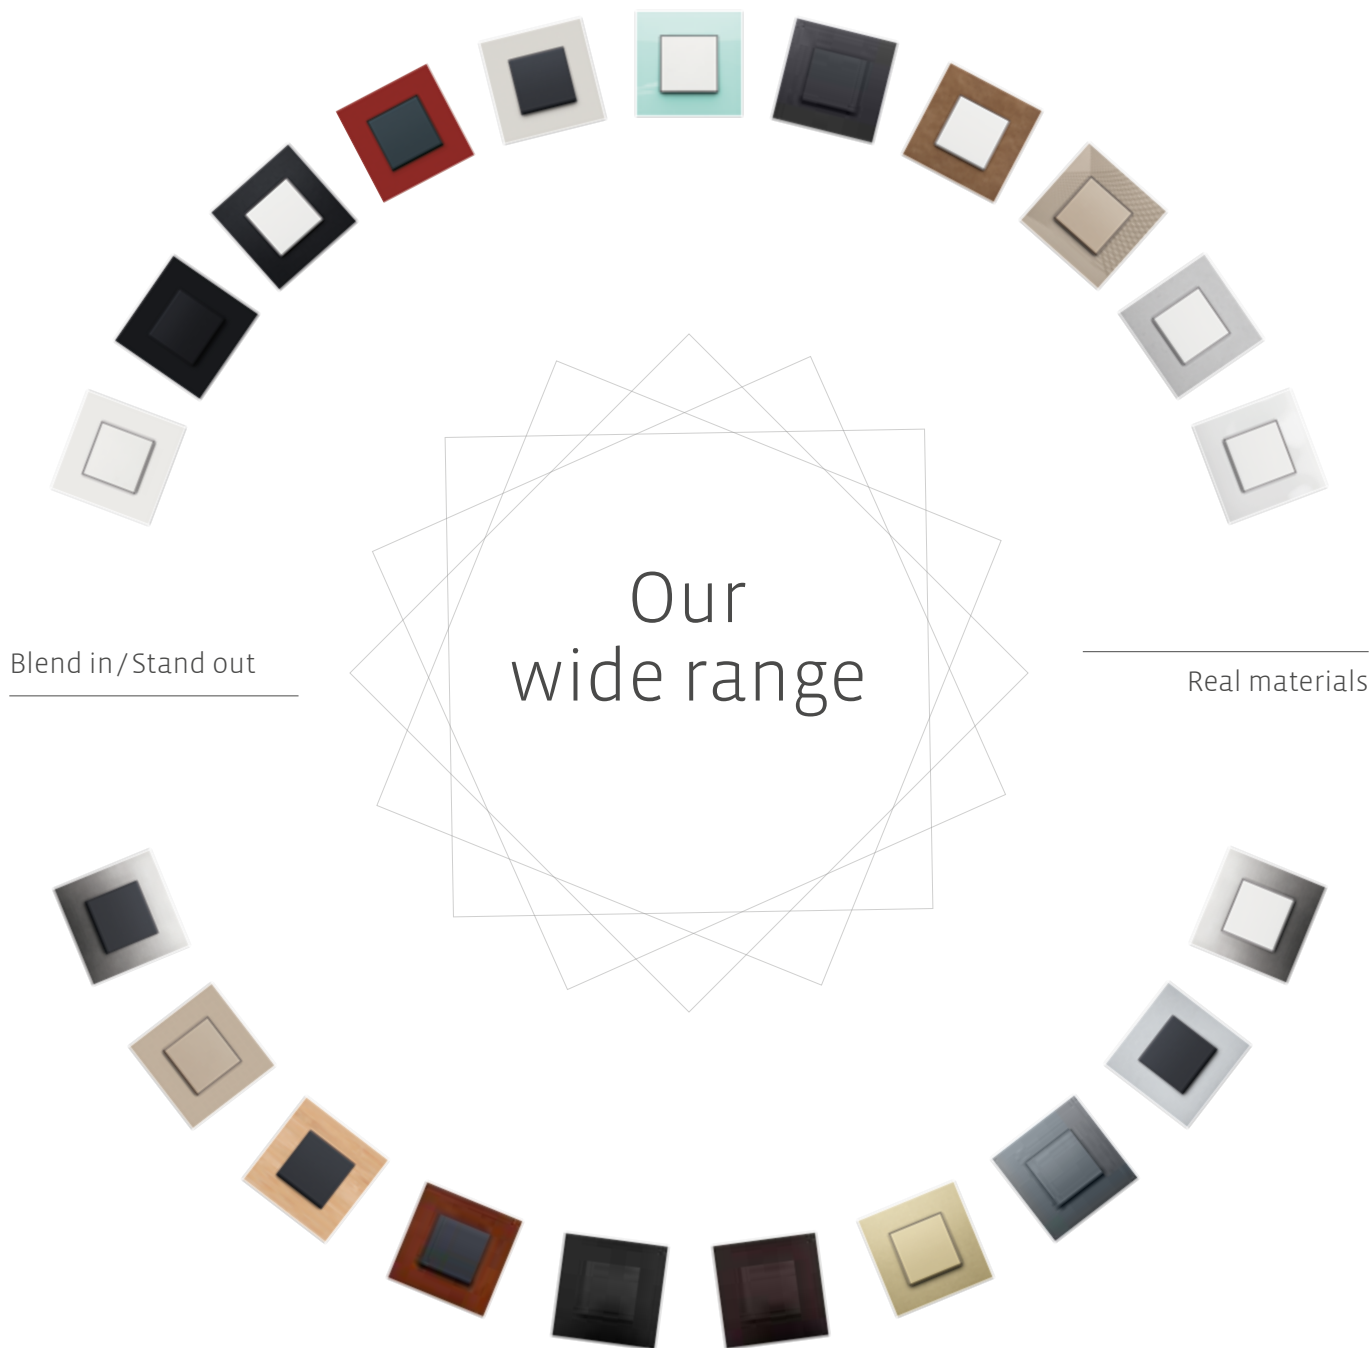

Every material has its own language. Whether it's brushed aluminium, weathered steel or Bakelite. With Niko's collection of unique materials you boldly choose to inject character and class into every room.

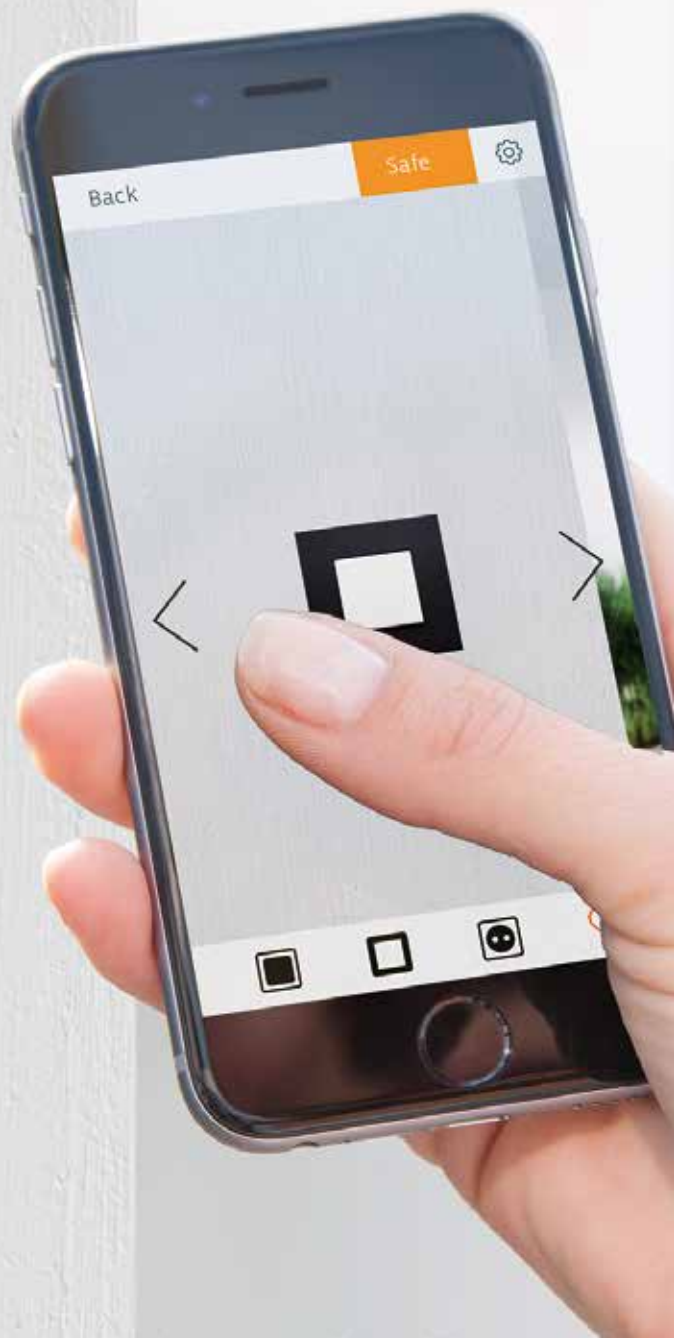

Blend in/Stand out

Real materials

Switch_{to}
home control

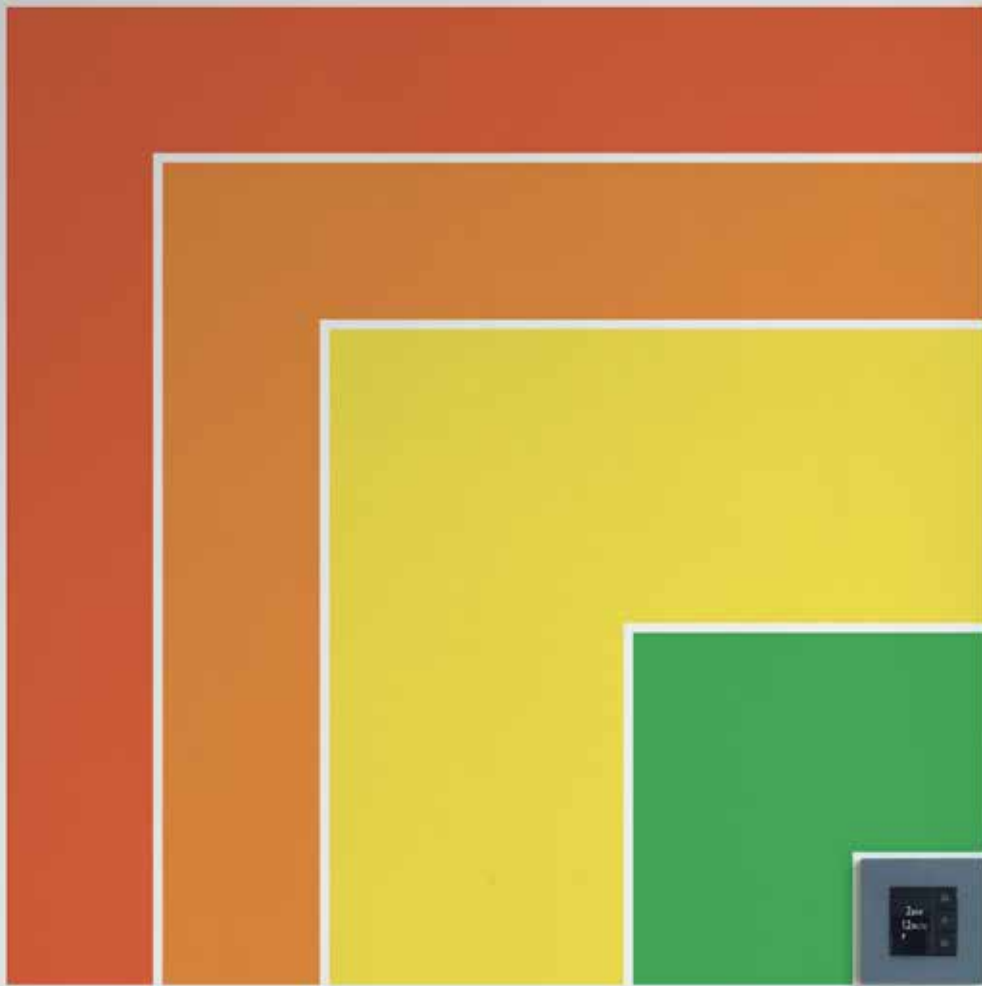

A finger on the pulse
of your home

Intelligent safety

Rest assured. Niko keeps an eye on your property while you are out enjoying life. Something seems not quite right? Simply push the panic button and the garden lights will come on. Startle effect guaranteed. No one at home? No one will know. Simulate your presence with automatic lighting and roll-down shutter control. Switch off your headaches. Switch to peace of mind. Switch to Niko.

Dim down your consumption

Intelligent consumption

Controlling and correcting your electricity, water and gas consumption effortlessly? With Niko Home Control you know exactly how much energy you consume. It helps you consume responsibly, and will also encourage your family to consume less. And the 'everything off button' is your first step towards a greener direction. Niko and eco have been walking hand in hand for many years. Offering solutions that benefit you, your family and the entire world.

Home in one button

Intelligent comfort

Niko Home Control is the heart of your home. Using the central in-home display, or your mobile device you can control your entire property in the blink of an eye. Making sure your living room is nice and warm by the time you get home? Lowering the roll-down shutters and dimming the lights with a few clicks? With Niko you can consider it done.

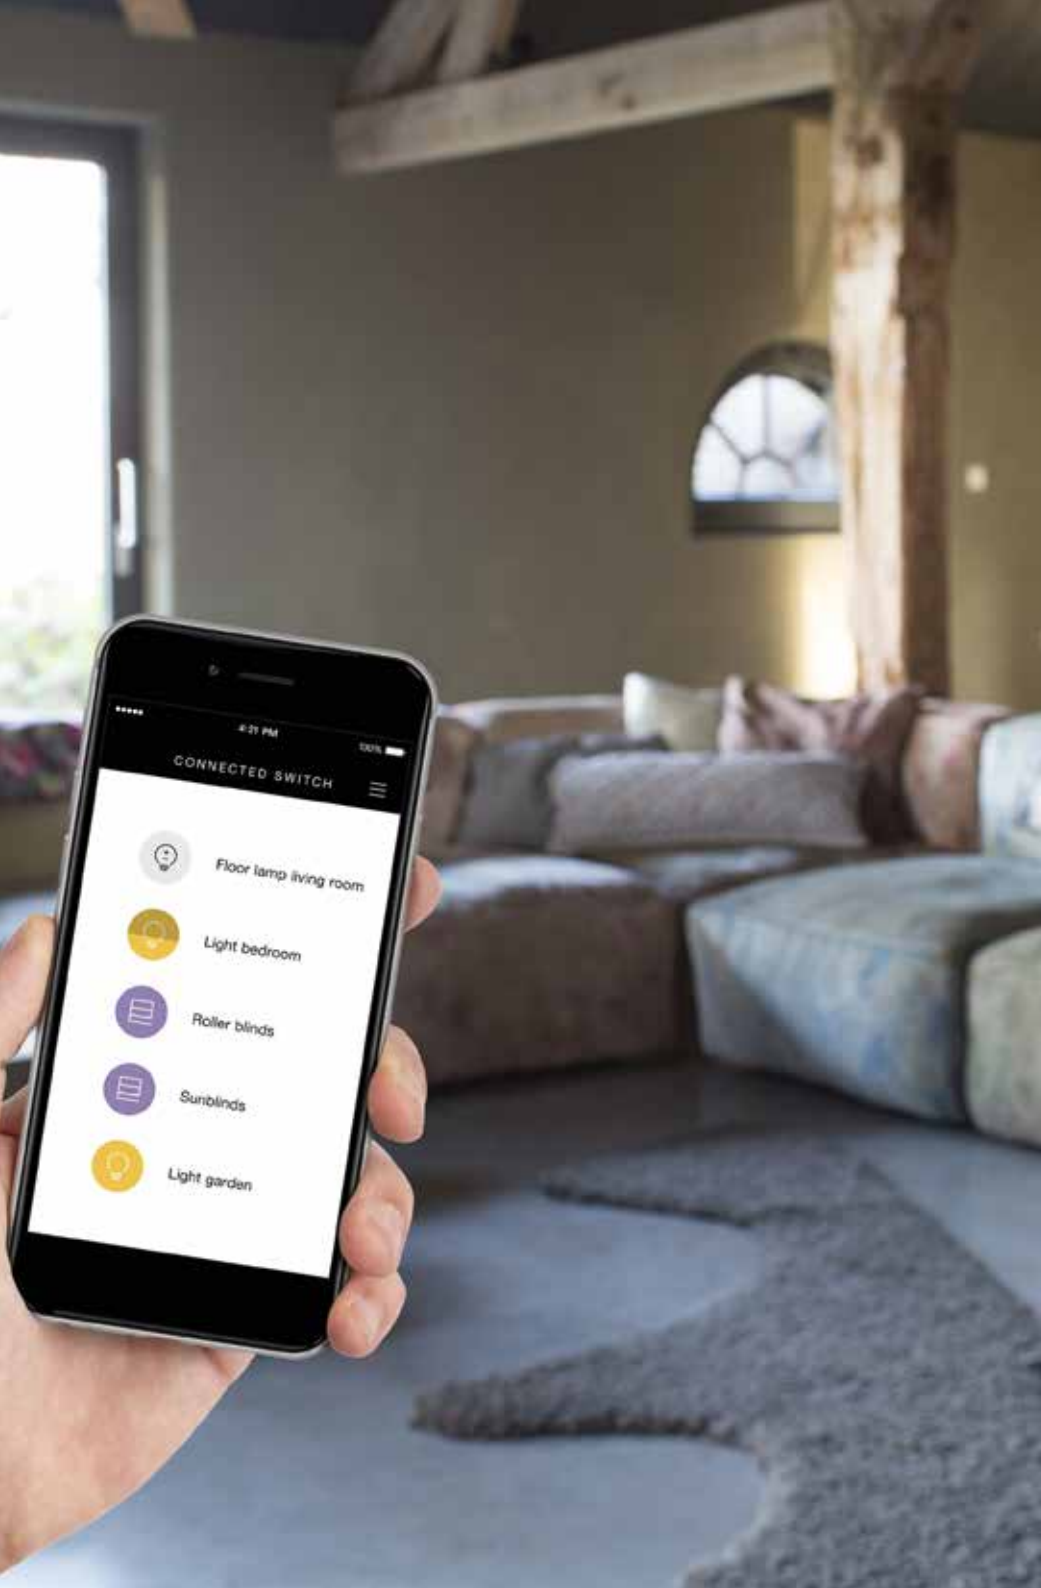

Because Niko Home Control works precisely according to the way you think: practically, intuitively and effectively.

Switch_{to}
smart solutions

All your switches on your smartphone

With the Niko connected switch app, you've got all your switches in your pocket. This clever app allows you to control your Niko wireless switches with a smartphone, tablet or smartwatch. This makes both existing homes and renovations work effortlessly smarter without drilling or channelling work.

A bright dimmer, a bold choice

Strong in light. That is the least you can say about Niko dimmers.

A simple turn is all it takes to match the light in each room exactly with your mood of the moment. At Niko you will find a dimmer for any type of lamp.

Niko LED strips: playing with colour

Red for a romantic evening. Or perhaps blue, for a relaxing afternoon of indoor play? With Niko LED strips the possibilities are endless. And what's more: you can use your mobile device to create the perfect atmosphere in just one click.

Take charge of the atmosphere

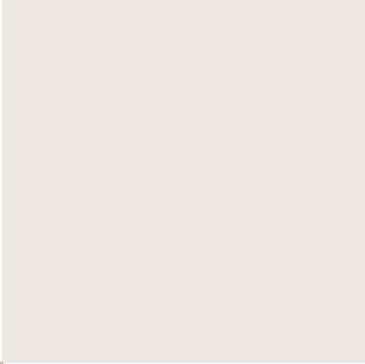

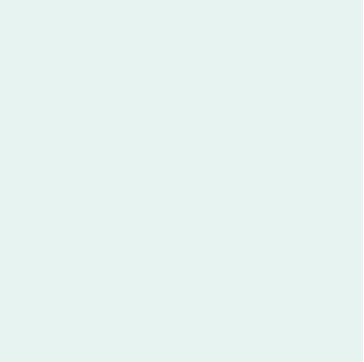

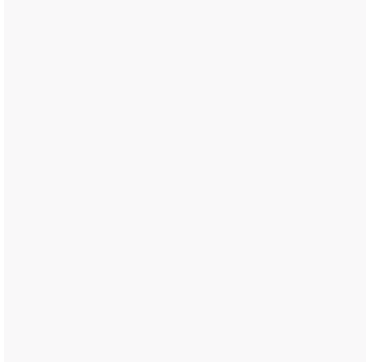

Your TV evening starts at 8 pm? Setting the timer, you can lower the roll-down shutters in the living room. Or let them go up when your alarm clock goes off in the morning. And when you are away on holiday, you can make the lights come on and give burglars no chance.

Fixed charging location

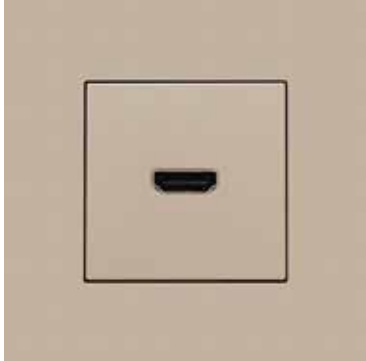

The USB charger is mounted in a flush-mounting box to help you put an end to the numerous chargers lying about in your home. All devices that can be charged via USB can now be charged quickly and efficiently from one single charging location.

Multimedia in every room

Digital and analogue television, USB connections, audio, data,... Contemporary living demands much more than electricity alone. Everything you need you will find at Niko. So you stay connected to the world in every room.

An eye for safety

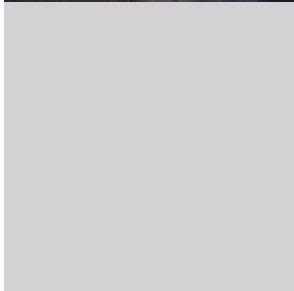

Safety, always and everywhere

With Niko you will stay on the safe side. Because you need 100% reliable products to turn your home into a carefree and warm nest for yourself and your family.

One push of the button is enough to find out who is at the door thanks to Niko door telephones and video phones. Not only do the motion detectors shine a light on your path the minute you get home, they will be the first to tell you when someone else approaches your house. Orientation lamps inside will also provide you with the optimal light conditions for nightly visits to the toilet.

A need for electricity in a damp environment? With the Niko Hydro splashproof socket outlets you can rest assured. Watering your patio flower pots and cleaning your car with a pressure washer? It's as safe as houses.

Switch_{to}
ecology

Niko, best friends with the environment

Niko equals eco design. From the early product design stages, we limit our environmental impact.

For instance, we work only with low environmental impact materials. And all plastic waste is ground and 100% recycled. That is part of Niko's commitment to reduce its ecological footprint day after day.

At Niko we put energy in consuming less

Anybody who chooses for Niko, chooses for responsible consumption. All of our products are developed to help you consume less. With Niko's motion sensors, LED strips and energy displays you have everything you need to reduce your energy bill permanently.

Switch_{to} Belgian quality

Designed in Belgium according to the strictest standards

Pure Belgian quality: that is what you get with Niko. Switching material, access control, lighting control and home automation are thoroughly tested during and after the production process, re-tested and... tested again, just to be on the safe side. Enough to give you a guaranteed life span of minimum 30 years for all switches and 2 years of extra warranty on top of the legal warranty period. Because it's hard to beat '**Designed in Belgium**', the label we are proud of.

Niko is the market leader in Belgium and produces solutions for switching material, access control, lighting control and home automation from its headquarters in Sint-Niklaas (Belgium).

Niko invests heavily in research and development as part of its ongoing commitment to focus on well-considered design and to produce the highest quality products in an environmentally-friendly manner. Niko's design philosophy is to consistently create the most innovative, aesthetically pleasing and user-friendly products on the market today.

The company is actively expanding into new markets, employs more than 630 people and has an annual turnover in excess of 125 million euros. Niko currently has offices across Europe in Belgium, France, the Netherlands, Slovakia and Denmark.
