## Base for a two-pole two-way switch, 10 AX/250 Vac, screw terminals

170-72200

Mechanism for a two-pole two-way switch, with claw fixing. Two-way switches are used to operate one lamp from two different locations. A finishing set and faceplate in the colour of your choice must be ordered separately.

## Technical data

Base for a two-pole two-way switch, $10 \mathrm{AX} / 250 \mathrm{Vac}$, screw terminals.

- Function: - switch
- block-shaped silver contacts (cadmium-free) in the form of a cross

- Protection degree: IP41 for the combination of a mechanism, central plate and faceplate
- Impact resistance: The combination of a mechanism, a central plate and a faceplate has an im-pact-resistance of IK06
- SBL load: 100 W
- Material base
- ureumformaldehyde (UF) with high heat resistance
- white RAL9010 (approximately)
- Flush-mounting frame
- 1 mm-thick metal
- galvanized on all sides after cutting, even on the cut edges
- with 4 grooves with screw hole of 7 mm
- with 4 screw holes (indicated by a screw symbol) with a diameter of 3 mm for mounting on panels
- Flush-mounting depth: 18 mm
- Required type of flush-mounting box
- depth: min. 40 mm (cabling space included)
- claw/screw fixing: 60 mm
- inner diameter box: 60 mm
- multiple boxes centre distance horizontal: 71 mm
- multiple boxes centre distance vertical: 71 mm
- multiple boxes centre distance vertical: 60 mm for Belgium and France
- Fixing method
- simple mounting in a flush-mounting box with grip surfaces
- with claws that rotate open using screws with a combination screwhead (Pz1 or slot $1 \times 5 \mathrm{~mm}$ ), for mounting in a flush-mounting box with grip surfaces
- engagement depth of claws: 31 mm
- claws can be pushed back into their original position
- claws can be easily pushed out using a screwdriver
- Centre-to-centre distance
- horizontal coupling and vertical coupling with centre-to-centre distance 71 mm
- horizontal connection of several bases is quick and perfect thanks to the folded-up dovetails on the left and right side
- extra robustness due to the folded-up edges on the outside of the base and the continuation to the inside of the base
- End border: 4 rectangular openings ( $7 \times 2.5 \mathrm{~mm}$ ) which, if the flush-mounting box protrudes from the plasterwork, can compensate for a margin of between 1 and 1.2 mm , so that the faceplate can still butt up perfectly against the wall
- Wire connection
- the sockets are fitted with cage clamps with permanent screws with combination screwheads (Pz1 or slot $1 \times 5 \mathrm{~mm}$ )
- every screw is provided with a screwdriver slot that prevents the screwdriver from sliding off the screwhead.
- Wire capacity
- all connection terminals at the top side of the base
- up to $2 \times 2.5 \mathrm{~mm}^{2}$ wire per terminal
- Stripping length
- 8 mm stripping length
- indelibly indicated at the rear side: stripping length and wiring diagram
- indelibly indicated at the front side: terminals and switch symbol
- Lighting element
- the base is provided with 2 rectangular recesses for a lighting unit
- left recess (front view): a lighting unit with wires or an automatic lighting unit can be clicked in
- rear side: round recesses for direct contact of the automatic lighting unit with the mechanism
- Ambient temperature: $-5-+40^{\circ} \mathrm{C}$
- Certification marks: CEBEC, ÖVE, KEMA, VDE, NF, SEMKO
- Marking: CE
$\overbrace{250 \mathrm{Vac}}^{10 \mathrm{~A}}$
$\frac{\sqrt{14}}{\text { CEBEC }} \mathrm{NF}$
$\mathrm{DV}_{\mathrm{E}}$
