

LED strip on roll 60 LEDs per metre. Colour LEDs: 6500 K (cold white LEDs)

340-11004

4 year
warranty

With an excellent colour rendition and a light output of 450 to 510 lm/m (depending on the white tone), the LEDs create the optimal scene. The LED strip is sold on a 5 m roll. The LED strip can be cut every 10 cm, at the markings to install the desired length. The adhesive tape on the back of the LED strip ensures easy mounting. For optimal LED control with all white tones, you use this product in combination with a wireless 4-channel constant voltage controller (410-00121) and an RGB(W) wall control in 4-button mode (article numbers 410-00002 + xxx-90002). You can save your favourite white tone in the constant voltage controller memory.

Technical data

LED strip on roll 60 LEDs per metre. Colour LEDs: 6500 K (cold white LEDs).

- colour saturation index Rg: 96
- colour fidelity index Rf: 82
- Function: The LEDs provide the optimum atmosphere with their excellent colour rendition and light output. The LED strip is sold in a 5 m roll and can be cut to the required length for installation along the dotted lines. The adhesive tape on the back of the LED strip makes it easy to mount.
- Colour rendition index (CRI) Ra: > 80
- Number of leds: 60 LEDs per metre
- Colour temperature: 6500 K (cold white LEDs)
- Light output: 510 lm/m
- Cutting distance: cutting interval: 10 cm
- LED format: 3528
- Power consumption: 4,9 W per metre
- Input voltage: 24 Vdc \pm 10 %
- Protection degree: IP20
- Dimensions (HxWxD): 8 x 5000 mm
- Marking: CE
