

# Surface-mounting RF receiver with 2 channels, 12-24 Vac or Vdc

05-335

4 year warranty

This surface-mounting receiver has 4 operating modes. You can connect one external impulse push button per channel. You may only use the device for switching low-voltage loads. The device has the following applications:

- ON/OFF via a 2-button function;
- ON when pressed and held, via push button function;
- control of roller blinds or shutters via 2-button function.

The roller blind and shutter function may only be supplied with direct current (DC).
