# Niko designs

## Belgian quality, pure design

Innovation, design and ease of use. These are the cornerstones for Niko's product development. **Intelligent solutions** increase your **comfort** and **ease of use**. So you know within seconds which button commands which device. The sleek shapes and refined details of our switching material are your perfect partners in making a **design statement**. Besides, you can't beat **Belgian quality**.

### Timeless and sustainable

The Niko finishes give you a **timeless design**, produced in **durable materials**. You choose the range that best matches your style. Would you like to change your switches after a few years? Easy: just replace the flush surround plates with new finishes and colours. The universal flush-mounting mechanism goes with any finish in Niko Pure, Niko Intense or Niko Original. Combined with the surface-mounting kit, this switching material can also be used for walls. Finally, there is Niko Hydro, specifically designed to withstand demanding and damp environments.

### Endless combinations

Combine the colours of the surround plates and devices to your liking. It's all up to you, down to the smallest detail. You can match socket outlets, switches, dimmers and media connections perfectly. Whether you go for a single combination throughout your home, or different ones in every room.

### 4-year warranty

The legal warranty period for switching material is 2 years. But with Niko you opt for the best quality. Every product we make is thoroughly inspected at every step in the production process. That is why we offer you a 4-year warranty. On all our products.

Pure white steel

## Your home, your style

Contemporary, retro or industrial: whichever style you choose, you want your socket outlets, switches, media connections and other functions to be perfectly coordinated. That is why with Niko Pure, Niko Intense, and Niko Original, we offer you the choice between 3 ranges of switching material.

# Niko Pure

Do you love an **ultra-sleek design** in timeless materials? Then you will love the refined look of Niko Pure. A series made from special, authentic materials such as bamboo, stainless steel, Bakelite and aluminium. Your guarantee of an elegant and sustainable finish. Top design, made affordable.

## The trendy switch in a timeless design

### Real hand-crafted bamboo

Niko Pure dark bamboo is made from real, sustainable bamboo. Each flush surround plate has an individual, finefibre structure, which feels warm and soft to the touch. No two products are the same. Every flush surround plate is individually finished by hand. Dark bamboo offers you a real piece of craftsmanship for your wall.

### Made for darker, more luxurious interiors

Darker shades, such as brown, midnight blue and burgundy are gaining in popularity. Matt and gloss alternate in your interior. A rougher finish combines beautifully with the polished shine of metal and the power of deep-veined marble. In today's world of mass production, you can still cherish the unique character of natural, hand-crafted materials. Exotic accents will give your interior that extra bit of class.

# Niko Intense

For Niko Intense, the touch and feel takes centre stage. The range has a minimalist **design** with **soft lines**. These give the switch a wealth of character.

# A timeless and elegant trend

## A contemporary switch for a home with innovative design?

It's hard not to lose yourself in the high-gloss **Niko Pure liquid black** finishing. The endless deep black colour of this contemporary switch stands out most in a minimalistic and technological environment.

## A matt black switch without compromising on style or affordability?

**Niko Intense matt black** is a finishing as black as the night and is the darkest shade in the range. The design is characterised by an intense black colour and a stylish matt texture. Elegant and timeless, but most of all versatile.

## Controls

No matter which control you are looking for, you will find it at Niko. Combine devices such as switches, USB chargers and dimmers **in the colours you love**. For example, the roll-down shutter controls or an eco-display can be perfectly matched to your switches and socket outlets. For each room a custom finish that fits nicely with its furnishings, of course this is also possible.

The functions are available in these colours:

	sterling		steel grey coated
	anthracite		cream
	bronze		light grey
	dark brown		greige
	champagne coated		black coated
	white		piano black coated
	white coated		gold coated

Niko designs electr(on)ic solutions to enhance buildings to better suit the needs of the people who live and work in them. By using less energy, by improving light comfort and safety and by making sure all applications work together seamlessly. Buildings with Niko are more efficient, are controllable from a distance and interact within bigger ecosystems. Niko is a Belgian family business from Sint-Niklaas with 700 employees and 10 European branches.

At Niko, there is one question that keeps us busy every day: “How can we enhance buildings to better suit your needs?”
