

# Presence or absence detector PIR 360°, 230 V, two channels, 24 m, 10 A, master, for flush-mounting (white)

**350-20072**

4 year warranty

This presence or absence detector with two channels (360°, 10 A) is suitable for flush mounting on ceilings and is used to switch indoor lighting or ventilation on and off. The detector has a circular detection area with a diameter of up to 24 m that can be adjusted using the cover mask. The device with integrated light sensor allows to set up each channel separately as a presence or as an absence detector. When used as a presence detector, the lighting automatically switches on and off (as soon as the switch-off delay has elapsed). When used as an absence detector, the lighting must always be manually switched on first using an N.O. push button, after which it will be automatically switched off (as soon as the switch-off delay has elapsed). The device is also equipped with the 'eco off' function, which allows the user to switch the lighting off using a connected N.O. push button without having to wait for the switch-off delay. If the lighting is not switched off manually, it will be switched off automatically once the switch-off delay has elapsed. The device has an IP54 protection degree, two potential-free contacts and conforms to the European EN 60669-2-1 standard for EMC and safety. The set-up can be performed manually on the device itself or via a remote control. The product can be used as a stand-alone unit or in combination with a maximum of ten secondary detectors. Finishing colour: white.
