

# Wireless receiver for motor control, for flush mounting

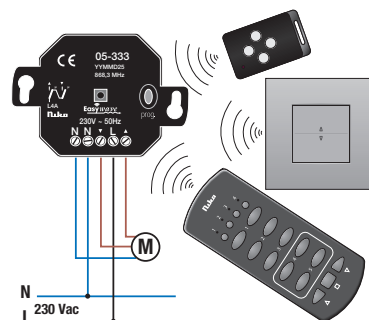

This mini receiver with switching contact (4 A/230 V AC) is used to control roll-down shutters or venetian/vertical blinds. The receiver can be operated by both wall-mounted and hand-held transmitters in a dual-button mode for the roll-down shutter functions (open, stop and close) or in a dual-button mode for the rotation of the vertical blinds. The operating time is 90 s. Thanks to its limited dimensions, it is easily flush mounted.

### Flush-mounting RF receiver with roller shutter function

This mini-receiver is used to control roller shutters and blinds. It is very easy to mount due to its compact dimensions. It works with both wall-mounted and hand-held transmitters. The run time is 90 seconds. With the 2-button mode, you can:

- open, close and stop the roller shutters and blinds;
- turn the vertical blind slats.

Technical characteristics:

- max. switch current: 4 A/ 230 V AC;
- dimensions: L70xW49xD29 mm.
