

Hole saw for plasterboard, Niko Invisible

170-10099

4 year
warranty

This hole saw is used to flush mount the products from the Niko Invisible range into plasterboard walls. This hole saw has a double saw blade: the first has a diameter of 80 mm and the second a diameter of 89 mm. The hole saw creates the perfect circular opening with a 5 mm collar that is required for the Niko Invisible plasterboard installation kit.
