

Home automation - wall-mounted printed circuit board without connection unit for push button

450-00022

4 års
garanti

With this complete wall-mounted printed circuit board, you connect one or more bell push button to the bus and send signals. You mount it on a single standard flush-mounting box for horizontal screw fixing. You do not need any additional flush-mounting boxes for the fixing of multiple faceplates. The Nikobus push buttons can be expanded in all directions from the flush-mounting box without extra drilling or channelling work. Niko delivers a 4-pole connector (2 for Nikobus and 2 for LED or infrared bus push-button power supply) standard with the wall-mounted printed circuit board. Niko also has a single wall-mounted printed circuit board with a metal bridge. This is used on uneven walls or in combination with other metal bridges, as with a socket outlet, thermostat or a traditional switch. A set of claws for boxes with no screw connection can be ordered separately. The connector is 4-pole (05-012-50 is 8-pole). You mount the bus push button with 1 central screw. The wall-mounted printed circuit board is attached to the wall with screws or claws.

Tekniske data

Home automation - wall-mounted printed circuit board without connection unit for push button

- Funktion: En vægmonteret printplade inkluderer alle de elektriske og mekaniske komponenter, der kræves for at tilslutte én eller flere trykknapper til Nikobus-installationen. Niko tilbyder horisontale, vertikale, enkelte eller flere printplader. Vælg typen af printplade afhængigt af antallet af nødvendige funktionsknapper og på en horisontal eller vertikal samling. Printpladen kan nemt udskiftes med en større på et senere tidspunkt, hvis der er behov for at udvide installationen. Du har brug for en tilslutningsenhed til hver vægmonteret multipel printplade, du ønsker at tilslutte. Tilslutningsenheder fås separat. Tilslutningen er udstyret med et 4-polet plug-in-stik med to forbindelser til Nikobus og to til LED eller infrarøde trykknapper til busstrømforsyninger.
- Fastgørelsesmetode
 - brug et sæt af gribere, hvis der ikke er skruehuller i dåsen til forsænket montering. Sæt af gribere til en enkelt vægmonteret eller flere vægmonterede printplade(r) fås separat.
- Materialetykkelse: 1 mm
- Godkendelse: CE
