# Niko connected switch

Your switches on your smartphone

# Create more options for your electrical installation

You have a traditional electrical installation and you would like to update? But you don't want to carry out major renovation work? Then the **Niko connected switch** is the perfect solution.

You could, for example, add extra switches in your home to control the same light. And your **smart switches can also be operated via your smartphone**. Operate your roll-down shutters from your armchair or workplace? Dim your lights from your armchair or workplace? It's all possible.

Thanks to Niko, you can easily replace old switches with '**smart switches**' or **wireless switches**. You can replace one or two, or all of them. It's up to you.

YOUR HOME WORKS BETTER WITH NIKO'S SMART SOLUTIONS

# A smarter house means more control

## More comfort

Dim the lights in your living room for a cosier atmosphere? Thanks to Niko connected switch, you don't need to leave your chair. **Control your switches via the app on your smartphone.** An extra switch next to your bed so you can turn the lights off? Stick it **where you want.**

## Living safely

Control the lighting in your home while you're at a restaurant or in the office, **so it looks like someone is at home.** It's great to come home to a well-lit house and it also deters unwanted visitors.

## Energy-conscious living

Programme the smart switches so **that your lighting goes on and off at specific moments.** The Niko connected switch is fitted with a handy weekly calendar.

- Rolliiken
- Zonwering
- Staanlamp zetel

# Daily comfort

Put the light off before you go to sleep? Turn off the central lighting in your bedroom via your smartphone or a stick-on switch **by the bed**.

Going on holiday and wanting to make it look as if someone's home while you're away. No need to ask the neighbours.

Set the lights to make them go **on and off automatically** (or make your roll-down shutters go up and down).

**Want to avoid wasting electricity** by leaving the lights on in the garden all night long? It's possible by activating the weekly calendar, so that your garden lights are turned off automatically **at the same time each evening**.

On a hot summer's day, when still at the office, you realise that you have forgotten to lower the sun blinds. It's not a problem, **as you can just lower the sun blinds from a distance** to enjoy a cool house when you arrive home.

Home late and walking to the back door in the dark? It's a thing of the past: just use your smartphone **to switch on the garden lighting when you're approaching.**

Would you like to let your family know that dinner's ready? Use a button to send your set **message to smartphones** in your household.

# The components of the Niko connected switch

## The gateway

The gateway makes a **secure connection** with the internet and connects your smart switches to the app.

## Smart switches

The smart switches **replace your old switches**. You can also expand to include extra wireless switches. Your smart switches can be controlled with your smartphone using the gateway.

## The app

The app turns your smartphone or tablet into the **remote control for the lighting, roll-down shutters, sun blinds, ...** Download it free in the App Store (iOS) or on Google Play (Android).

## Wireless switches

**Stick** the wireless switch exactly where you want it and make it as easy as possible to control lighting, sun blinds or roll-down shutters. A wireless switch can be connected to a smart switch or wireless receiver.

## Wireless receivers

A wireless receiver is operated by a wireless switch or via your smartphone. It can be used to make your **lighting** go on or off, or your **roll-down shutters** go up or down.

## Web portal

Set the switches via the web portal [myconnectedswitch.niko.eu](http://myconnectedswitch.niko.eu). There, you also set the **weekly calendar**, e.g. to lower the roll-down shutters at 18.00 every evening in the winter. And you can set **notification buttons**, e.g. 'I am home' or 'dinner's ready'.

# Stylish design

The neutral colours of Niko Original, the subtle lines of Niko Intense or the ultra-sleek design of Niko Pure: our smart and wireless switches are compatible with all contemporary interiors.
