

Base for a wireless dimmer switch, 60 x 71 mm, claw fixing

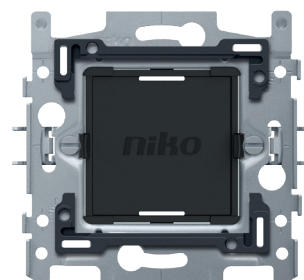

360-00000

4 year warranty

Base with claw fixing for mounting a wireless dimmer switch (for Hue system, EnOcean®, Bluetooth® and KNX®). You can click it together and combine it with one or more flush-mounting mechanisms from Niko. This article is protected by at least one patent (application). For more info on patents, see www.niko.eu/innovation.

Technical data

Base for a wireless dimmer switch, 60 x 71 mm, claw fixing.

- Fixing method
 - simple mounting in a flush-mounting box with grip surfaces
 - with claws that rotate open using screws with a combination screwhead (Pz2 or slot 1 x 5.5 mm), for mounting in a flush-mounting box with grip surfaces
 - engagement depth of claws: 23.5 mm
 - claws turn back completely when loosened
- Centre-to-centre distance
 - Simple and quick assembly of one or more mechanisms by the indication (chalk line, laser, etc.) of the centre of the flush-mounting frame
 - vertical coupling centre-to-centre distance 60 mm by sliding several bases into each other; they lock themselves automatically
 - vertical coupling centre-to-centre distance 71 mm using pre-formed lips at the bottom, by folding the lips downwards over a length of 1 mm, the bases support each other and the centre-to-centre distance is guaranteed.
 - horizontal connection of multiple bases is quick and perfect thanks to the folded-up dovetails on the left and right sides
 - extra robustness due to the folded-up edges on the outside of the base and the continuation into the inside of the base
- Marking: CE
